**WRECKING PERMIT APPLICATION INSTRUCTIONS
 COMPLETE BOTH PAGES**

1. Obtain all applicable signatures on the wrecking permit application. Contact information for all required signatures can be found on PAGE 2, the wrecking permit application.
2. After all applicable signatures are obtained, submit completed wrecking permit application to the One Stop Center for wrecking permit processing and issuance. Permit fees are \$5.00 per 100 square feet with a minimum \$50.00 permit fee. Be sure to include garage square footage when applicable.
3. Once the wrecking permit is issued and demolition has commenced, schedule an open hole inspection to ensure that all of the structure has been removed and sewer laterals have been capped. **SEE NOTE BELOW**
4. Once the open hole has been filled, schedule a fill inspection to ensure that an approved fill material has been used to fill the open hole.
5. Once the open hole has been filled and topsoil is graded and seeded, schedule a FINAL inspection.

I have read and understand the regulations regarding demolition procedures. I realize that these procedures are a condition of my wrecking permit. There may be other requirements or conditions above and beyond the ones listed above.

NOTE: Effective September 23, 1995, whenever buildings or structures are demolished, all structural elements (footings, foundations, slabs, etc.) shall be removed from above and below the surface. Once all of the structure has been removed, only approved fill may be used. Per City of Dayton ordinance, approved fill material is "pit-run" gravel, crushed gravel, or crushed limestone. Topsoil shall be used to bring the land to finish grade and the lot shall be seeded.

The owner of the property may appeal to the Chief Building Official the requirement to completely remove the structure. The Chief Building Official's decision may be appealed by requesting a hearing with the Nuisance Appeals Board. This request must be made in writing within 15 days of the decision.
